ORYVEX DEMONSTRATION PHARMACEUTICAL QUALITY REPORT

==========

FICTIONAL DEMONSTRATION INCIDENT REPORT — FOR TESTING PURPOSES ONLY
NOT A REAL PHARMACEUTICAL RECORD OR SPECIFICATION

==========

INCIDENT ID: INC-2026-0881
DATE DISCOVERED: 2026-10-18
INCIDENT DATE: 2026-10-17
DEPARTMENT: Quality Control / Chemical Synthesis Operations
INVESTIGATION OWNER: Dr. Elena Rostova (Lead QC Analytical Specialist)

PRODUCT AND BATCH INFORMATION:
Product Name: Artemicort API (Synthetic Glucocorticoid Intermediate)
Batch Number: ART-2026-042
Manufacturing Stage: Stage 3 — Final Crystallization & Solvent Recovery
Equipment Identifier: Crystallizer Unit CR-04 (Vessel Capacity: 2,500 L)
Affected Quantity: 480 kg (Bulk API Crystalline Powder, Lots 1-4)

INCIDENT SUMMARY:
During release testing of Artemicort API Batch ART-2026-042, high-performance liquid chrom

OBSERVED RESULT:
HPLC assay showed Impurity D-7 at 0.38% (w/w).

EXPECTED RESULT / SPECIFICATION:
Finished API Specification SPC-ART-004 mandates: Any individual unspecified impurity <= 0.

IMMEDIATE CONTAINMENT ACTIONS:
1. Batch ART-2026-042 (Lots 1 through 4) placed under physical and SAP quarantine status i
2. Red quarantine security tags applied to all 16 fiber drums.
3. Crystallizer CR-04 tagged out of service pending investigation.
4. Downstream micronization and distribution withheld.

PROCESS AND OPERATIONS CONTEXT:
During Stage 3 crystallization, the batch recipe calls for a controlled cooling curve from
Operator shift handover log indicates that at approximately 02:40 IST on 2026-10-17, secon
Agitation speed was recorded at 65 RPM.

MISSING / PENDING MANUFACTURING RECORDS:
- SCADA continuous temperature trend logs for Crystallizer CR-04 and Chiller CH-02 between
- Metrology calibration verification for Dual-RTD Temperature Sensor TT-204 is pending rev
- Raw Material Certificate of Analysis for Reagent Grade Isopropanol Lot IPA-8839 (used du
- Operator shift interview notes from Shift B have not yet been compiled.

POTENTIAL PRODUCT QUALITY IMPACT:
Impurity D-7 is a known thermal degradation byproduct of Artemicort API. Elevated levels m

SEVERITY ASSESSMENT:
Initial Severity: Critical

Severity Rationale: Out-of-Specification (OOS) analytical result impacting finished bulk d
